Experience **The POST** 2025 - 3
Full Stack - Developer Remotely

Upwork, Fiver and khamsat

Full-Stack, Desktop Applications

Contributed to and designed a number of projects that demonstrated skills in Django, Lua, Mean Stack, C Sharp, and other technologies.

NTI

Full Stack Training

Cairo Higher Institute (CHI)

Full-Stack, Summer Training

Education **Cairo Higher Institute** Computer Science
CS
Bachelor of Computer Science

Projects **Faculty of Nursing** 2025
<https://nursing.dmu.edu.eg/>

Contributed to the development of the Faculty of Nursing, Damanhour University's website, showcasing its academic identity, institutional accreditation

EG-Pricey

June - 2025

<https://eg-pricey.com/>

Contributed to the development of *Eg-Pricey*, an Egyptian price-tracking platform featuring real-time updates on currencies, gold, fuel, and food prices. Also implemented a dedicated **financial tools section** for interactive calculations such as loans, investments, and savings, helping users make informed financial decisions.

Localization and Payment Integration

October - 2024

SaaS

<https://xtranslator.app/>

- supporting multiple languages and regions.

- Integrated Lemon Squeezy for streamlined and secure payment processing, adhering to global standards.

- Implemented rate-limiting features to protect the application from abuse and maintain high performance under load

TileGreen Web

<https://tilegreen.org/>

TileGreen's official website, a pioneering Egyptian startup specializing in transforming plastic waste into sustainable, carbon-negative building materials. The site showcases the company's innovative technology that converts non-recyclable plastics into over 40 eco-friendly construction products, including interlocking tiles, bricks, and urban furniture .

Contact Management

Developed a robust RESTful API for managing contacts, featuring real-time capabilities and secure data handling.

Key Features:

- Implemented JWT-based authentication with secure password hashing using bcrypt.
- Integrated Socket.IO for real-time updates and notifications.
- Established a lock management system to prevent concurrent data modifications.
- Ensured data integrity through comprehensive validation rules.
- Optimized data retrieval with pagination support.
- Applied industry best practices for security and error handling.
